Evaluation of Clinical Educator Survey

Our Department uses an online system for the midterm and final evaluation of all courses and practica. Our Department is required to collect this information in order to maintain our accreditation. Therefore, it is required that you complete a survey for each course in which you are enrolled. Your feedback will allow your instructors and clinical educators to learn about individual student needs and to make modifications that will enhance and promote learning. Each survey takes less than 5 minutes to complete and consists of 10 Likert scale questions and one question that will allow you to type in suggestions.

During the last week of each semester, you will receive a survey for each course in which you are enrolled. You will be asked to evaluate each clinical educator with whom you work. The link and password for each survey will be provided. You will be given one week to complete the survey. Your responses are confidential.

Your cooperation in participating in our online evaluation process is greatly appreciated!

Dr. Angela Losardo  
Chair, Department of Communication Sciences and Disorders
