Site Selection

All practicum sites are selected by the Director of the Communication Disorders Clinic and Clinical Faculty Committee in consultation with the Chair of the Department of Communication Sciences and Disorders. The sites represent a wide variety of settings and experiences, including public schools, private practices, skilled nursing facilities, medical centers, and specialized programs. The clinical educator supervising the students must have appropriate experience and credentials for the professional area in which clinical education is provided. All sites must provide updated information concerning the practicum site and clinical educators on the Clinical Population form (Appendix B) and Clinical Educator Information form (Appendix C) at the beginning of the semester in which the student is placed at the facility. All supervisors must provide a current copy of their ASHA card and a copy of their licensure for the state in which the facility is located.
